
Losing sidebar of emoticons

Posted by NMB08 - 2008/07/24 00:24

Hi,

When I type a post and write a long sentence or two like I am trying to do here, the window shifts so I can see my words. But then the emoticon sidebar and some other words shift left and I can't find an option to scroll it back.

Any suggestions?

Thanks :)

Can you post or PM me a screenshot of this please?

thanks
